***Residential Energy Efficiency
for Existing Buildings***

Builders, electrical and HVAC technicians, real estate professionals, home inspectors, contractors, loan officers and energy auditors will gain a solid understanding of residential energy use. From structural design characteristics to airflow and heating, this comprehensive course includes principles of energy, heating and cooling, understanding the building envelope, lighting and appliances, air leakage, water heating, insulation, health and safety, windows, and doors. This course is perfect for anyone who will be advising clients on household energy use. Look for residential energy diagnostics training coming this spring.

10 Mon., Jan. 19-March 23, 6-10 p.m.

Aero Park Campus, M-TEC Rm. 224

Instructor: Gary Cook

Cost: \$575

Code: 9655
